Projects

- **AI Image Caption Generator**

The AI Image Caption Generator automatically creates meaningful, contextual descriptions for images using advanced deep learning techniques. It combines computer vision (CNN) with natural language generation (RNN/LSTM) to understand visual content and produce fluent English captions.

- **PeopleHub-App**

HR Performance & AnalyticsDashboard

Built a full-stack HR management tool using the MERN stack (MongoDB, Express, React, Node.js) designed to automate daily operations. Key features include a mobile QR code scanner for instant check-ins, real-time analytics dashboards for data-driven decisions, and robust security with JWT/Bcrypt authentication.

- **CodeNest-Labs**

Created a robust PHP-based service platform

CodeNest Labs, optimizing lead capture workflows by implementing a custom MySQL-backed contact engine. Focused on security by deploying standard password encryption methods and ensured architectural scalability through modular PHP scripting
